APPENDIX 1

PROCESS : ROTATING DISC ELECTRODE ATOMIC EMISSION SPECTROMETRY OF OILS

Performed in accordance with the following documents:

- ASTM D 6595
- PS-15 (Terraverde In House procedure)
- IU-10 (Terraverde In House procedure)

With the following resources:

None

This Qualification is based on the following results:

- | | |
|----------------------|--|
| - EDIQL n° 2008-6328 | EUROCOPTER Qualification of Laboratories for SOAP Analysis |
| - ETLL n° 2017-1023 | Spectrometry analysis Qualification Program |
| - ETLL n° 2017-1024 | Audit Report |
| - ETLL n° 2017-3414 | Results of the round robin TERRAVERDE / AIRBUS Helicopters |
| - ETLL n° 2017-2289 | TERRAVERDE Approval |

The Qualification is subject to the following specific conditions:

For AH customers, the results must be compared to the AH defined limits.

Restrictions:

None

Maintain of the qualification

The qualification of the laboratory will be maintained if the cross-test results are satisfactory. They will take place during the third year after qualification or renewal. **The Qualified Laboratory will have to request AH to perform a cross test to keep its qualification.**

This qualification could be suspended or cancelled at any time in case of decrease in quality. All modifications initiated by supplier must be submitted to AIRBUS Helicopters for approval. In case of AIRBUS Helicopters documentation revision, modifications have to be implemented or request for deviation have to be submitted to AIRBUS Helicopters for approval.
